INTERNATIONAL SEARCH REPORT

International application No.
PCT/NZ2003/000248

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos :
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☐ Claims Nos :
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos :
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:
See extra sheet.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
1-26, 32-54, 75-76

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.

Supplemental Box

(To be used when the space in any of Boxes I to VIII is not sufficient)

Continuation of Box No: II

The international application does not comply with the requirements of unity of invention because it does not relate to one invention or to a group of inventions so linked as to form a single general inventive concept. In coming to this conclusion the International Searching Authority has found that there are five inventions:

- Claims 1-26, 32-54 and 75-76, directed to methods of analysing and displaying information relating to software licenses. The collation of license data from a sales database is considered to constitute a first "special technical feature."
- Claims 27-31, directed to a method of displaying an analysis of software license data. The graphical comparison between the number of computer users and the number of licenses is considered to be a second "special technical feature."
- Claims 55-64, directed to a method for selecting a software product. The use of separate panes to select product type, variation and version is a third "special technical feature."
- Claims 65-69, directed to a method for linking company names. The use of company name abbreviations is considered to be a fourth "special technical feature."
- Claims 70-74, directed to a method for displaying linked company names. The display of links between primary and secondary company names is considered to constitute a fifth "special technical feature."

Since these groups of claims do not share any of the technical features identified, a 'technical relationship' between the inventions, as defined in PCT rule 13.2 does not exist. Accordingly the international application does not relate to one invention or to a single inventive concept. As searches for the additional inventions will require more than a little additional search effort over that for the first invention, additional search fees are warranted.

INTERNATIONAL SEARCH REPORT
Information on patent family members

International application No.

PCT/NZ2003/000248

This Annex lists the known "A" publication level patent family members relating to the patent documents cited in the above-mentioned international search report. The Australian Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
